

Setting up Android for my email accounts

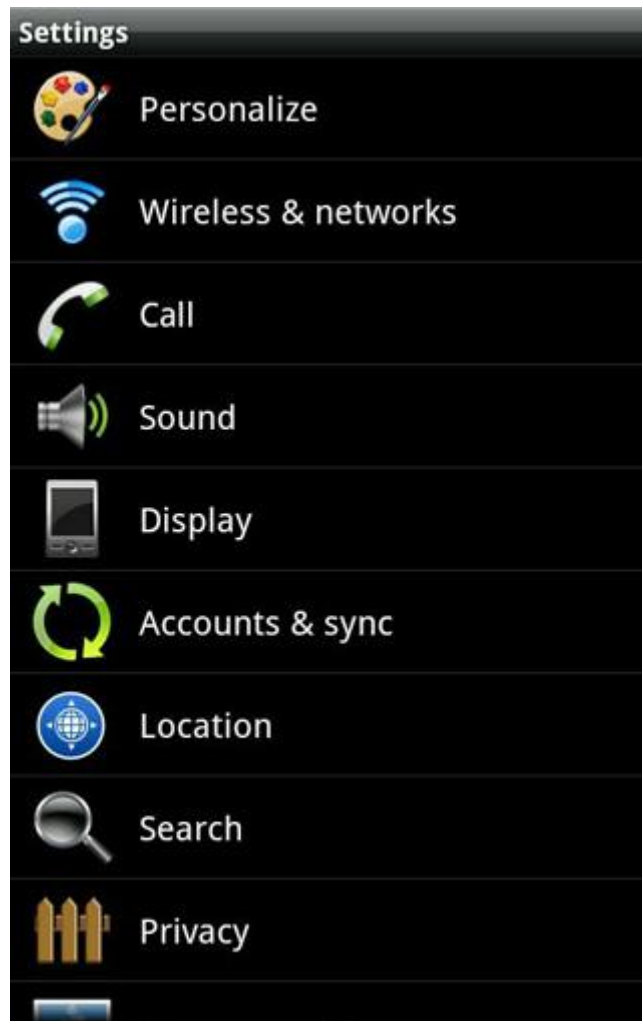

The following article explains how to setup email account to your Android phone.

To configure your Android (software version 2.x) for email, please follow these steps:

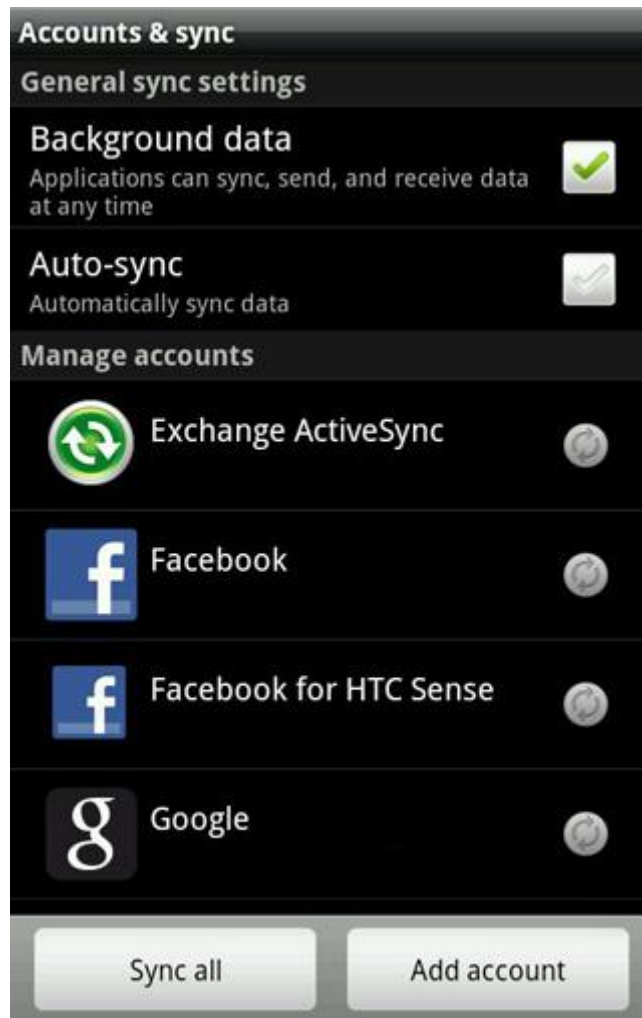

1. From the **Apps Screen**, click **Settings**.

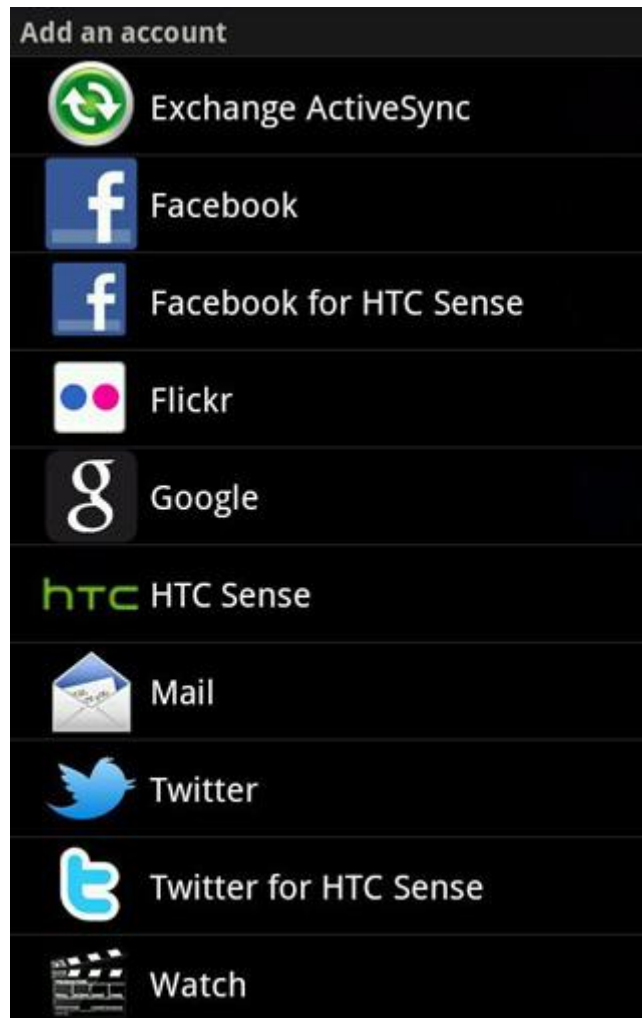

2. Under **Settings**, select **Accounts & Sync**.

3. Select **Add Account**

4. Select **Mail** as the type of account.

5. Click the **Manual** setup button.

Enter the requested information and click **Next**:

- 6.
- **Email Address:** the email address of the mail user
 - **Username:** the email address of the mail user
 - **Password:** enter the users password
 - **Server:** enter mail.affordablecarpentrywa.com.au

The image shows a mobile application screen titled "Incoming settings". It contains several input fields and dropdown menus for configuring email settings. The fields are: Protocol (set to IMAP), Email address (email@mydomain.com), Username (email@mydomain.com), Password (masked with four dots), IMAP server (mail.mydomain.com), Security type (set to None), and Server port (143). At the bottom, there are two buttons: "Back" and "Next".
